RESEARCH EXPERIENCE

PhD Research (<i>Supervisor: Dr. Wing-Yee Chow</i>) <i>Division of Psychology and Language Sciences</i> I conducted studies examining how comprehenders update predictions during real-time language processing when encountering informative cues. Designed and conducted experiments using EEG, eye-tracking, mouse-tracking, and pupillometry. Communicated research findings through journal publications and conference presentations.	2021 - 2025 <i>University College London, London</i>
Research Assistant (<i>PI: Dr. Taomei Guo</i>) <i>State Key Laboratory of Cognitive Neuroscience and Learning</i> I assisted with a project investigating the brain networks involved in processing positive and negative emotional words in the two language systems of bilinguals. Performed a systematic review and meta-analysis of fMRI studies. Collected fMRI data and analysed the data using extended unified Structural Equation Modeling.	Feb - June, 2021 <i>Beijing Normal University, Beijing</i>
